

Regional Dialogue

**“Use of the frequency bands 3,4
– 4,2 GHz for FSS and terrestrial
broadband applications**

**Mr. Claudio Palomares Sartor
Chairman, Working Group relative to satellite systems
for fixed and mobile services**

PCC.II

DECISION PCC.II/DEC. 46(VIII-06)

(Puerto Ordaz, Venezuela)

Bearing in mind that the VIII PCC.II meeting has accepted the invitation of the organization Global VSAT Forum for a distance dialogue concerning the use of band C in the Americas Region, to instruct the Executive Secretary of CITEL

DECISION PCC.II/DEC. 46(VIII-06)

- To contact Global VSAT Forum (GVF) to define the schedule and agenda for the event in question
- To send the GVF invitation, together with the defined schedule and agenda, to all the CITELE member Administrations to see who would be interested in taking part in this distance dialogue and in being one of the six possible venues.
- To coordinate the presence of a CITELE representative at the forum.
- In the event of great demand, to ask GVF whether there will be another opportunity to repeat this event in future

Use of the band 3600 – 4200 MHz

- Band C y C_extended for FSS.
- Part of the band for IMT-Advanced (WP-8F, WRC-07)
- Part of the band for Broadband Wireless Access (i.e. WI-MAX.)

Issues to consider for discussion

- Impact of possible new services on existing FSS
- Possible coexistence
- Technical parameters
- Government choice
- Others
