
ITU Spectrum Management Training Program (SMTP)

Addressed problem

- Efficient running of Spectrum Management (SM) requires well educated professionals;
- Today there are no formal holistic SM education programmes;
- Spectrum managers must also have a clear understanding of legal and economic issues;
- Large institutions train SM staff by seconding them to experienced workers, but this offers narrowed vision and no formal quality check. This is not possible in smaller institutions.

The solution: Smtp

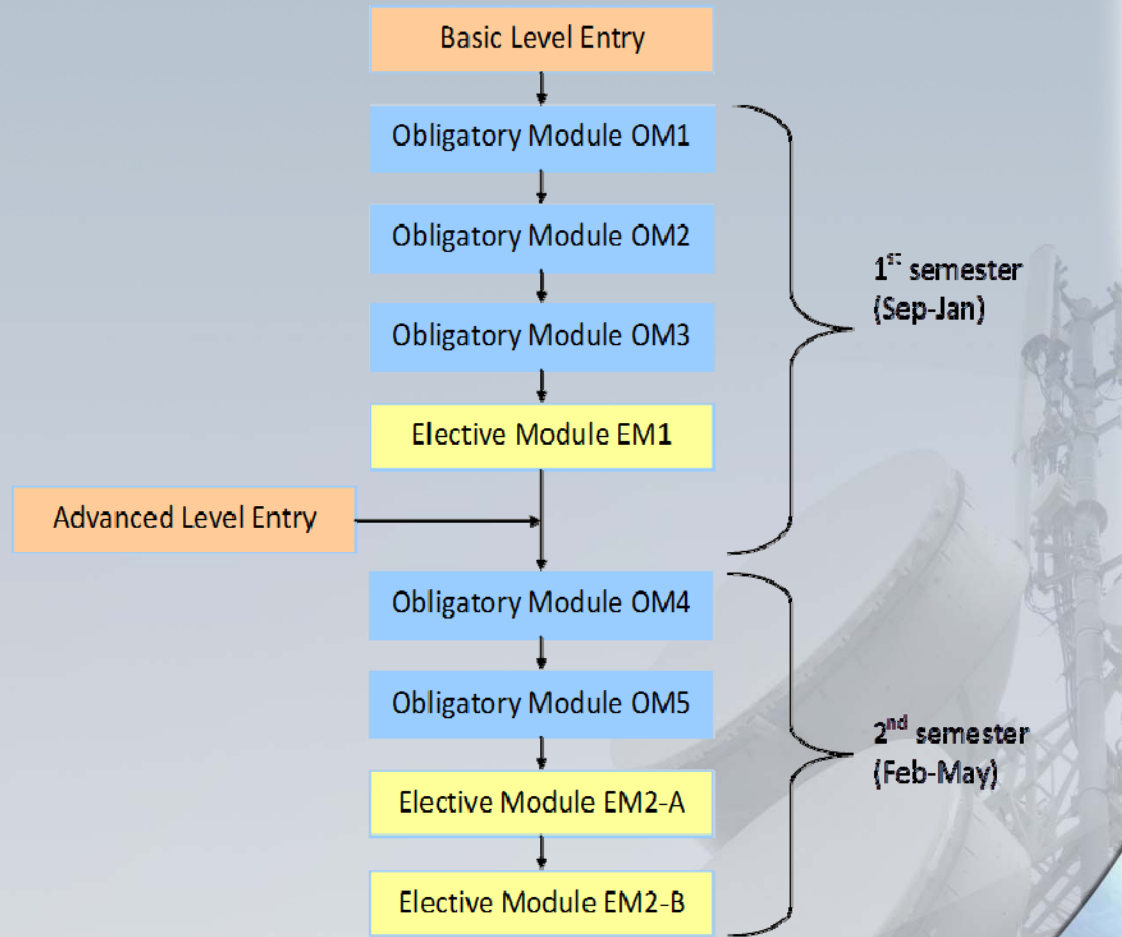

- First in a series of ITU training programmes
- It offers access to SM training and forward-looking professional vision
- Full set of high level materials prepared by high caliber subject-matter experts
- Materials sanitized through Quality Assurance Mechanism
- Designed for anyone either a beginner or a specialist
- Provision of certain level of knowledge
- Different certification options
- International recognition, with possible option of university credits/diploma

Programme objectives

- Provide ITU membership with capacity building solutions in SM
- Provide access to the latest learning tools
- Build human and institutional capacity by designing and making available high quality training materials

The vision

- Two entry levels
- Specialisation possibility:
 - Technical
 - Legal/economic
- Accordingly structured set of obligatory modules and specialised electives.
