PROPOSALS FOR THE WORK OF THE CONFERENCE

Agenda item 7(C)

7 to consider possible changes, and other options, in response to Resolution 86 (Rev. Marrakesh, 2002) of the Plenipotentiary Conference, an advance publication, coordination, notification and recording procedures for frequency assignments pertaining to satellite networks, in accordance with Resolution **86 (Rev.WRC-07)**, in order to facilitate rational, efficient and economical use of radio frequencies and any associated orbits, including the geostationary-satellite orbit;

7(C) Issue C - Issues for which consensus was achieved in ITU-R and a single method has been identified

Issue C is a collection of several different topics that are viewed as being straightforward and for which consensus was readily achieved within ITU-R. The issues address such things as resolving inconsistencies in regulatory provisions, clarifying certain existing practices, or increasing transparency in the regulatory process.

Issue C1

BACKGROUND: It is generally recognized that provisions in Appendix **30B** relating to coordination and notification were actually written on the model of provisions in Article **9** and **11**. In particular, we note that paragraph *§8.13* of Article 8 in Appendix **30B** is similar to No. **11.43A** except for the use of the word “notified” instead of “recorded” although both provisions deal with modifications to frequency assignments in the MIFR. The differences between the two terms were deemed significant enough to create an issue under agenda item 7.

In response to this issue, the ITU-R developed [Preliminary draft] CPM Report with a single Method for the alignment of *§8.13* of Article 8 in Appendix **30B** with No. **11.43A**. It is proposed to implement the modifications to the Radio Regulations in accordance with this Method.
